# Recreation kit

## Shipping details:

The metal box may present problems if being transported into a country with x-ray machines at border points or during transportation – in this case, the Recreation in a Carton Kit (S9935034) may be a better option

## Transport and Storage:

Storage of the footballs and volleyballs in hot temperatures for long periods of time may affect the quality of the ball material. The box comes with 2 padlocks which can be used to lock the contents of the kit when not in use

## Shelf life:

Estimated as 1 year

## Instruction for use:

The kit is designed to be used by 90 children at one time in both indoor and outdoor areas.

## Alternative if the item is not available:

The Early Childhood Kit (S9935064) should be used for children under the age of 6. The Recreation in a Carton Kit (S9935034) should be ordered if there are concerns about the metal box.

## Context in which item is mainly used:

The kit can be used in both Emergency contexts but it can also be used where a country suddenly faces an influx of students(e.g. if school fees are abolished) and supplies are needed urgently.

## Target population:

Children aged 6 and over.

## Emergency scenarios where the item should not be used:

The kit should not be used in areas where there is insecurity travelling to/from the learning area and in the learning area.

## Cultural considerations:

Where UNICEF branding is considered a security concern – the branded items should not be externally displayed, worn or carried.

## Climate considerations:

Storage of the footballs and volleyballs in hot temperatures for long periods of time may affect the quality of the ball material. Children should have access to safe water supplies during the recreation activities

# Collapsible Jerry Can, 10L

UNHCR/UNICEF/IFRC/ICRC

## Specifications

Collapsible water container, with a capacity of 10 litres, can withstand a 1.8 meter drop test when full, made from food grade material, LDPE.

UV resistant, can withstand ambient temperatures of -20°C to +50°C. Suitable for drinking water storage, tested and approved by recognized and specialized laboratories.

Fitted with:

Carrying handle, minimum 9 cm long and 3 cm high, with no sharp edges  
An opening of 32 mm diameter, with a matching screw cap for filling/discharge  
The screw cap should be held with a retaining strap.

## Drop Test

When filled with water at 20°C, the container must be able to withstand a 1.8 meter drop on a hard surface.

The test will be considered successful if no leakage is observed after the drop.

The height of the drop will be measured from the ground level to the bottom of the container.

# Bucket,HDPE,with lid,14 L

UNHCR/UNICEF/IFRC/ICRC

## General Description:

Bucket (container), stackable, round, made of HDPE (High Density PolyEthylene), with lid, cap and plastic handle, capacity 14 litres. Called "the OXFAM bucket".

## Technical Specifications:

Bucket made of HDPE (High Density Poly Ethylene), UV resistant and safe for food and water storage.  
The bucket capacity is 14 litres.  
Height 33 cm, top diameter 31 cm  
The top is reinforced to prevent ovaling.  
The walls shall meet the bottom of the bucket with a curved surface to prevent dirt accumulation and facilitate cleaning.  
The bucket has a tight-fitting lid of the same material of the bucket with an attached push-on cap.

## Shipping details:

160 buckets could be stacked on a standard US pallet (100 x 120 cm) to a height of 110cm.  
Packing: 8 buckets stacked inside a plastic bag. A second stack of 8 buckets in plastic bag can be stacked on top of the first. 10 such double stacks are packed one beside the other inside one export carton (bottom up). The lids are packed by number of 8 in 20 separate plastic bags and placed between the buckets.

## Instructions for use:

The bucket provides a good water transportation and storage container when the lid is kept sealed.  
The lid to be taken off only for periodic cleaning  
The bucket can be filled through the cap.

## Comments:

A plastic tap option could be added.

## Drop Test

When filled with water at 20°C, the bucket is able to withstand a 1.8 meter drop on a hard surface.  
The test will be considered successful if no broken is observed after the drop.  
The height of the drop will be measured from the ground level to the bottom of the container
